

INTEGRA LIMITS UNCERTAINTY

For Hospitals

For Surgeons

For Patients

INTEGRA[®]
LIMIT UNCERTAINTY

Limiting uncertainty is how we make a difference.

Integra limits uncertainty by helping you do the same. You need processes to be transparent so you can take care of everything. You need to be ahead of changes so problems don't surprise you, and you need a medical technology business partner to provide solutions that help reduce length of stay (LOS), reduce OR time and utilize fewer surgical steps. At Integra, we help you address those issues as we're committed to what you care about.

Staying in control means limiting the uncertainties

That means staying on top of everything, and Integra helps you by finding ways to reduce steps and prevent issues before they happen so you can concentrate on the important matters of the day.

Integra reduces length of stay¹

Our products are designed to help patients get home more quickly and reduce costs.

Integra saves time in the OR²

We help you increase your hospital's total economic value and patients' safety by helping you be as efficient as possible in the operating room. We develop product solutions that eliminate steps and simplify procedures.²

Integra understands risk, so you're never alone in limiting uncertainty

Running a hospital means you must involve many parties in the decision-making process, often considering the financial pressures that your facility is under. Integra never stops limiting uncertainty, by building capitated payment models that drive cost savings and predictability.

Integra LifeSciences, a world leader in medical technology, is dedicated to limiting uncertainty for its customers so they can concentrate on providing the best patient care. Integra offers innovative solutions in orthopedic extremity surgery, neurosurgery, reconstructive and general surgery.

¹ Integra® DuraSeal® - Than KD, Baid CJ, Olivi A. Polyethylene glycol hydrogel dural sealant may reduce incisional cerebrospinal fluid leak after posterior fossa surgery. *Neurosurgery* 2008; 63 (Supp11): ONS182-ONS186.

² Integra® NeuraGen® - Boeckstyns, Michel E.H., MD, et al. "Collagen Conduit Versus MicroSurgical Neurorrhaphy: 2-Year Follow-Up of a Prospective, Blinded Clinical and Electrophysiological Multicenter Randomized, Controlled Trial." *Journal of Hand Surgery*. 2013; Vol 38 No 12: 2405-2411.
